Belts for Mail Sorting industry

We know your production process

Ammeraal Beltech is one of the leading belting suppliers to global major O.E.M.'s and is geared to meet the exact demands of the mail sorting industry. Every day, billions of letters are sorted and distributed for further transport everywhere in the world.

Highly efficient rubber coatings guarantee accurate pitch between the letters, resulting in reliable performance on all kind of sorters. RAPPLON® High Performance Flat Belts feature antistatic properties to prevent electrostatic build-up assuring precise grip of envelopes at highest speed.

Key requirements for these applications are energy saving, high wear-resistance, optimal friction and low operating-noise. Our RAPPLON® flat belts offer high-quality features for perfect mail-sorting processes:

- Special covers
- Antistatic properties
- Engineered for hi-speed
- Fabric reinforced
- Highly wear resistant
- QuickSplice

Your business is our business!

Your production process:

- | | |
|---------------------------------------|--------------------------|
| A Leveller | E Encoder |
| B Format control | F Bar code reader |
| C OCR Optical Character Reader | G Stacker |
| D Video coding | H Delay section |

Increasing speed and performance

RAPPLON® GG E0314 FFQ
Multipurpose letter transport

- Energy saving
- Firm vertical holding of mail piece
- Mail piece stays parallel to deck
- Constant gap between mail pieces
- Straight and firm tracking
- No damage of mail piece
- No displacement between belts
- Lowest operating noise level

Increasing efficiency on VCR Systems

RAPPLON® GG N15 FFQ black

- Excellent high conductive properties to prevent electrostatic build-up
- No reflection and high contrast, increasing efficiency on VCR module
- Elastic belt construction fits easily on common shafts
- Special fine structured surface ensures precise grip of mail pieces at high speed

Gentle and efficient Processing

RAPPLON® UV N12 FQ
Compensates speed difference between belts on bull wheels

- Special fleece cover on one side compensates the speed difference
- High elastic belt allows compensation of letters with different thickness over 10mm
- No damage of envelopes and its contents

Unique features offering outstanding advantages for your benefit

Feature	Advantage	Benefit
PES-Fabric with high E-Modulus	No elongation	No re-tensioning necessary
Highest flexible tension member	Lowest possible energy consumption	Less operational costs
Fine structure	Significant noise reduction	Pleasant working environment
Special belt covers	Gentle mail piece handling	No waste, no marks on paper
XNBR rubber cover	Highly wear resistant	Long service life, accurate pitch
Engineered for hi-speed	Improved productivity	Highest sorting capacities
State of the art products	Approved by the market leader of mail sorting equipment	Mail sorter runs reliable max. output guaranteed
QuickSplice joining method	Fast and simple splicing with QSP-Tools	Safe joint, everybody can splice
